DETAILED ACTION***Response to Arguments***

Applicant's arguments filed on July 29th, 2004 have been fully considered but they are not persuasive. The applicant argues that Resnick does not disclose a mask that has a supporting portion of a facepiece insert. The examiner disagrees. The applicant's definition of a facepiece insert is something that allows filtration elements and/or valves to be adequately secured thereto. The cup 40 in Resnick meets that criteria (see column 5 lines 60-67).

The applicant also argues that Resnick and Scholey fail to provide a fluid communication component that is no-integrally joined to the supporting portion of a facepiece insert. The applicant's definition of fluid communication component is an element that is structured to allow a fluid to pass from an interior gas space to an exterior gas space or vice versa. The exhaust valve 70 of Resnick (fluid communication component) is mated (non-integrally joined) to the supporting portion of cup 40 (facepiece insert).

In conclusion claims 1-23 are still rejected as applied to in the previous office action dating back to April 20th, 2004.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not

mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
